The MillenniumTM School
— Surat —

NEW AGE SCHOOL
FOR EVERY

UNIQUE
LEARNER

Who are we?

MILESTONES OF TMS

It all started with an unprecedented vision to build a school that would shape a whole new generation of men and women ready to lead the rapidly changing world of tomorrow. Our endeavour led to the emergence of the largest research and development initiative in India. Educationists spent 10 years developing a scientifically designed curriculum to suit every learner. It helps shape a cultivated mind which is aware, analytical and application-driven, while being recognised as unique in its own right. Our only mission is to bring about a change through education by using technology, innovative strategies, and hands-on activities which will impact generations to come.

01

What makes us different?

OUR VISION

The Millennium School is committed to nurture the inherent potential and talent of each child, to create lifelong learners who will be the leaders of tomorrow. With Parents as our partners, we aspire to create global citizens who are innovative and have a strong sense of values.

OUR CORE VALUES

We consider it vital to instill in students a strong set of core values. This, in turn, helps shape their lives and the world around them. Universal values and ethical codes of conduct are included to enable them to build their future and benefit the society.

02

Our Leadership

Ms. Monica Khurana

Principal

I believe that my role as an educator is to nurture and guide the next generation to establish skills to achieve fulfilment, respect, prosperity, and health.

As Principal, I use tools available to inspire staff, students, and the community to work together to promote student achievement and overall well being. Here at The Millennium School, we get ample opportunity to work towards our goal.

The ability to be innovative and effective is important to me. I enjoy being inspired and challenged by the students and the people around me. Staff and students need to be enthused and challenged to be inventive and imaginative in their learning and day to day tasks. The ability to be effective and innovative which is essential for the professional growth of the teachers is catered at The Millennium School.

To borrow John Hattie's words, "teachers should build classroom climates where errors are welcome, student engagement is the norm, questioning is high and students gain reputations as effective learners"

Community engagement and involvement in the school is of utmost importance in any Institution, along with self-review and encouragement at every step.

We at The Millennium School are able to provide all this and much more. We build a culture of positivity, progress, and learning as we walk every day together to establish the Nation of our dreams through our future leaders.

Our Facilitators

OUR TEACHERS ARE TRAINED TO ENSURE QUALITY EDUCATION & PROVIDE ENRICHING LEARNING EXPERIENCE FOR OUR STUDENTS.

Our Curriculum

OUR LEARNING SYSTEM

Our system is a unique learning system that is scientifically developed and is based on the best teaching systems in the world. It is inspired from ancient Indian philosophy of learning and matches all the best international practices in education. For our students, learning becomes a fun and exciting experience. It takes learning beyond books and classrooms and prepares the students for the universe and not just the university.

**UNDERSTAND, ANALYSE, SOLVE
& TO THINK CRITICALLY**

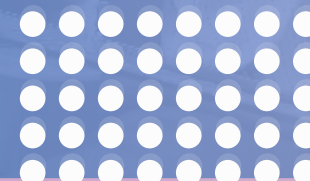

Our Programmes for Primary Stage

Our Preparatory Stage curriculum features innovative tools like Amira Learning, an AI tool, for personalised reading support, and an introduction to Robotics for hands-on exploration of coding and engineering at an early age. Storytelling nurtures creativity and communication, while our special music curriculum, Harmonizing Future fosters cognitive and emotional growth through structured musical education. We prioritise emotional well-being through "Circles of Safety", and enhance learning with topic-based field trips, ensuring students engage deeply with their studies in real-world contexts. Additionally, our Shape India program emphasizes physical health and fitness, helping students build strong bodies alongside strong minds.

Our Programmes for Middle & Senior Stage

At the Middle and Secondary stages we provide a comprehensive learning experience that prepares students for the future. Our Mentorship Program offers personalized guidance and collaboration with the Parents, while the Young Visionary Summit initiative fosters leadership, and innovation in a VUCA environment. The Externship Program gives students real-world exposure to industries, and the Financial Literacy program equips them with essential money management skills. Emotional well-being is supported through "Circles of Safety", and our annual University Fairs connect students with higher education pathways. Additionally, the Reverse Mentoring Program encourages mutual learning between different age groups, empowering younger students to share their insights with their senior peers.

Our Well Rounded Education

TAKEAWAYS Takeaways are thematic and inspiring and largely focus on hand and mind coordination in the early years.

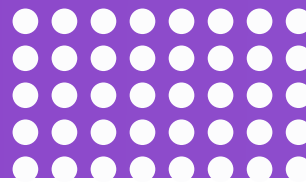

NEWSPAPER IN EDUACTION We believe in exposing children to all current affairs in education and innovation while giving them opportunities to compile the learning in the form of newspapers, articles, declamations, and descriptions frequently. We are associated with newspapers in education to felicitate extensive literacy skills.

FIELD TRIPS Field trips are arranged frequently in each term to enhance further learning in children.

We Don't Build Scholars, We Build Personalities Too

At our school every child is identified, recognised and nurtured through the unique Talent Development Program (TDP) which opens a world of opportunities for students beyond the four walls of a classroom. Each child is encouraged to take part in co-curricular activities, enabling them to spread their knowledge wider. Our well-trained staff is able to churn out champions. From academic excellence to co-curricular activities, the students bring home laurels from all over the world.

Life at Millennium

OVERVIEW

Millennium family believes in a holistic approach, which implies moving beyond academics. Learning is a lifelong process and should empower each individual to the best of his/her ability. A constant learning and mentoring process ensures that the learning process becomes meaningful and effective for every child.

We prepare students for the new and emerging challenges of the 21st century. Life at Millennium includes just about everything that you do during your years as a student from academics to sports, from drama to travel. We offer a diverse range of activities, from experiential learning programmes to numerous athletic endeavours, art experiences, and student activities, and clubs. Students build connections through exposure, and participate in environment conservation and social welfare programmes.

We consider parents as our partners in the child's journey towards excellence. Thus, regular parent connect programmes are organised to ensure that both the school as well as the parents jointly support children in moving towards their goals.

Our Achievements & Recognitions

Why Choose Us?

An award-winning curriculum that is progressive, age-appropriate and scientifically designed

1

Internationally acclaimed, unique, and innovative pedagogy

2

A wide variety of activities and projects to make learning interactive and application-based

3

Performance Enhancement Plan (PEP) to strengthen the foundation of learning

4

Caters to every child's learning style (Visual, Auditory & Kinaesthetic)

5

An exposure to over 850 vocations to take forward as a career

6

Technology-enabled smart classrooms and learning tools

7

Highly qualified and trained teaching faculty

8

Extensive focus on arts, culture and physical activities

9

A comprehensive range of teaching and learning strategies
